

AUSRACK PATCH

For all network patching applications, Ausrack Patch provides a cost effective, robust and accessible 19" racking solution.

Ausrack Patch is designed to provide a functional and cost effective solution for network patching applications.

The Ausrack Patch is an ideal solution for applications where accessibility is a major requirement. The simple, open construction, ensures that not only is installation simple, but access can be gained to both the front and rear of equipment at all times.

Available in 40 and 45RU configurations the Ausrack Patch system is supplied flat packed for easy transportation, but has been designed to be both quick and easy to assemble.

Also included is a full range of cable management accessories to make cabling easy, and management of

the cable bundle simple. All cable management accessories are bolt on extras, so can be included or extended as the installation grows.

- Cable Management System - this includes fixing brackets, front and rear cover panels and 3 cable management rings
- Cable Management End Panel - for installations at the end of a suite, the bundle can be covered with this end panel
- Cable Management Rings - helps keep cable bundle tidy

Functional and cost effective the Ausrack Patch is a great solution to any network patching installations.

AUSRACK PATCH

Technical Information

The Ausrack® Patch includes a bolt down base and a 19" rail profile. A bolt in cable management system is also available. This can be installed between two Ausrack Patch or at the end of a suite or single rack by also including an end panel.

For more details of dimensions and available accessories, please request a copy of our catalogue from your local sales office or visit our website on www.brdatasystems.com.au.
