

AUSRACK PLUS NETWORK

The Ausrack Plus Network cabinet is the most fully featured and functional 19" rack for passive patching networks. With a visually appealing design for data room applications and a robust construction, it retains the award winning cable management features of the original Ausrack cabinet.

Available in 24, 40 and 45RU heights, with depths of 600 and 900 mm and widths of 600 and 800 mm, the Ausrack Plus Network range includes plenty of space for all your networking equipment requirements.

The rack rails are suitable for all 19" equipment and comply with both the EIA and SSI specifications required by active equipment manufacturers.

The cabinets include easy to use, bend back cable entries and an open base, so that cable access is simple from almost any direction. Additional accessories are available to further enhance cable management, including cable trays, horizontal cable managers and chimneys.

Recent enhancements to the range include easier installation

and moving, with options of retractable feet and low profile rollers. Also cabling flexibility has been improved, as all horizontal support arms are height adjustable, and cable entries in the base are aligned for all rack depths.

A comprehensive range of accessories is available to help you find a solution to your specific requirements. These include the Ausrack Cable Zone, an extension to the side of the cabinet that can be fitted as and when required, to allow for cabling, or even cooling space.

For all medium to large passive patching networks, try the Ausrack Plus Network for a tailored and functional network installation.

AUSRACK PLUS NETWORK

Technical Information

The Ausrack® Plus Server includes a frame, four RU marked mounting rails, side panels, front and rear mesh doors (split on the 800 mm wide racks).

Model Number	RU	Height	Width	Depth
AN24U606	24	1202	600	600
AN24U609	24	1202	600	900
AN40U606	40	1913	600	600
AN40U609	40	1913	600	900
AN40U809	40	1913	800	900
AN45U606	45	2135	600	600
AN45U609	45	2135	600	900
AN45U809	45	2135	800	900

24RU cabinets supplied with ARTF flat top cover, 40 & 45RU cabinets are supplied with gland plates fitted into the roof.

The table shows standard sizes available from stock. Other sizes and configurations are available upon request.

Accessories

A full range of accessories is available including power rails, shelves, fan kits, blanking panels, cable trays, horizontal cable managers and more.

For complete details of the range of accessories ask for our catalogue or visit our website www.brdatasystems.com.au.

Features

The Ausrack® Plus Network is a result of extensive market research and testing. The special features incorporated as part of the range include:

- Cabling system with intelligent placement of knockouts, large available area and bolt on cable zone for flexibility and easy expansion when required.
- Cabling management accessories including a chimney, cable tray and horizontal cable managers. Also suits Siemon vertical cable management system.
- Fits all 19" equipment by complying with EIA-310-D and SSI specifications to which server manufacturers design.
- Security features such as two point door locking with options of privacy panels and side panel latch and lock kits.
- Easy to move and repurpose with optional fully retractable adjustable feet, heavy duty rollers and a flexible cabling system.
- Allows a full rack to be utilised with a tested static load rating (UDL) of 1400 kg and a seismic load rating of 900 kg.
