

AUSRACK WALL

Ausrack Wall mount enclosures are robust, cost effective, easy to install 19" cabinets. They are used for smaller applications such as housing patch panels and network apparatus, where floor space is at a premium.

Ausrack Wall is perfect for small network installations. The swing frame only models enable easy installation and maximum accessibility for maintenance. The detachable swingframe can be mounted on the wall, allowing equipment to be installed into enclosure, before mounting it onto the swingframe.

Enhanced for strength, the Ausrack Wall cabinets now has the capacity for more equipment while maintaining integrity and performance. The fully loaded Ausrack Wall closes comfortably providing a safe working environment. Bevel door with maximum viewing window, allows sight of all items installed in cabinet.

The cabinet comes with an adjustable pair of rack rails, with the option of a second set of rails.

The cabinets are manufactured in Australia from robust zinc coated steel, with a highly durable neutral colour textured powdercoat finish to suit an office environment.

With an improved range of wall cabinets with enclosure body depths of 250,350,450 and 600 mm, the Ausrack Wall product offer has a cabinet to suit all applications.

AUSRACK WALL

Technical Information

The Ausrack Wall includes provision for cable entries on the rear top and bottom at the rear of the cabinet. The rear door option allows for surface mounting cable entry, with cutouts in top and bottom of the frame. All cabinets come with equipment rails. (see table below)
