

Transmission Racks

Transmission racks are designed for installation inside telephone exchanges, to house standard telecommunications equipment and accessories.

All enclosures are supplied with an earth tree (except Type-04), brackets for mounting the enclosures to a low superstructure, a component tube containing four adjustable feet, floor bracing brackets and various fasteners and accessories to facilitate easy installation. Door available as an option. Type-04 racks are supplied with cable management ducts and do not come with an earth tree.

Model No	Description	Dimensions (mm)			Front Cabinet			Rear Cabinet

▲ TEL-585/00143	Type-92C SDH [#]	1800	600	600	19"/21"	-	19"	19"/21"	19"

* 19" front/140/170 mount requires TEL-905/01511 (purchase separately).

[#] SDH racks are identical to PDH racks with the exception of the left hand equipment rail, which has a fibre channel incorporated.

Doors

Allow the use of transmission racks when the equipment/data handled is critical to the business, and needs to be secured to prevent unauthorised access.
